Quality Performance Score

Mass import EHR data

Security Official Reporting Decisions

Accountable Care Organization (ACO)

ACOs are groups of doctors, hospitals, and other health care providers, who come together voluntarily to give coordinated high-quality care to their Medicare patients.

The goal of coordinated care is to ensure that patients get the right care at the right time, while avoiding unnecessary duplication of services and preventing medical errors.

ACO and Quality Reporting

ACOs must report quality data to CMS after the close of every performance year to be eligible to share in any earned shared savings and to avoid sharing losses at the maximum level.

For 2023 performance year, ACOs can report via the CMS Web Interface that requires them to submit data on a sample of Medicare patients for each quality measure.

Your ACO has contracted with Health Endeavors to collect quality data and send to CMS.

2023 Quality Reporting for ACOs

CMS Web Interface (GPRO)

10 CMS Web Interface quality measures

1 CAHPS for MIPS Survey

2 Claims-based measures

Random Sample (Medicare only)

MIPS CQM/eCQM

3 eCQM/MIPS CQM quality measures

1 CAHPS for MIPS Survey

2 Claims-based measures

70% of all eligible patients (Medicare and non-Medicare)

What is the time period to report quality data?

Description	Time Period
Patient ranking files to be available for download from CMS Web Interface.	December 21 st , 2023
Patient list populated in Health Endeavors CMS WI Random Sample 2023 interface.	48 hours upon receiving the sample
ACO 2023 quality reporting period.	January 2 nd , 2024 – April 1 st , 2024
Last date to safely manually key 2023 quality data.	March 24 th , 2024

2023 CMS Web Interface Quality Measures

10 measures required to actively report.

Quality measures set same as in 2022 performance year.

There are substantive annual changes to the 2023 measure specifications.

The coding documents were updated with annual coding changes.

10 CMS Web Interface Quality Measures

1. **ACO-13 (CARE-2)** Falls: Screening for Future Fall Risk
2. **ACO-27 (DM-2)** Diabetes: Hemoglobin A1c Poor Control
3. **ACO-28 (HTN-2)** Controlling High Blood Pressure
4. **ACO-40 (MH-1)** Depression Remission at 12 Months
5. **ACO-20 (PREV-5)** Breast Cancer Screening
6. **ACO-19 (PREV-6)** Colorectal Cancer Screening
7. **ACO-14 (PREV-7)** Influenza Immunization
8. **ACO-17 (PREV-10)** Tobacco Use: Screening and Cessation Intervention
9. **ACO-18 (PREV-12)** Screening for Depression and Follow-up Plan
10. **ACO-42 (PREV-13)** Statin Therapy for the Prevention and Treatment of Cardiovascular Disease.

2023 CMS Web Interface Quality Measures Changes

- **(CARE-2) Falls: Screening for Future Fall Risk**

Initial population updated to patients aged 65 and older at the start of the measurement period with a visit during the measurement period.

- **(DM-2) Diabetes: Hemoglobin A1c Poor Control**

Removed: "Only patients with a diagnosis of Type 1 or Type 2 diabetes should be included in the denominator of the measure; patients with a diagnosis of secondary diabetes due to another condition should not be included."

Denominator Exclusion: To assess the age for exclusions, the patient's age on the date of the encounter should be used . In previous years, the guidance was - to assess the age for exclusions, the patients' age at the end of the measurement period should be used.

2023 CMS Web Interface Quality Measures Changes

- **(HTN-2) Controlling High Blood Pressure**

Denominator Exclusion: To assess the age for exclusions, the patient's age on the date of the encounter should be used. In previous years, the guidance was - to assess the age for exclusions, the patients' age at the end of the measurement period should be used.

2023 CMS Web Interface Quality Measures Changes

- **ACO-40 (MH-1) Depression Remission at 12 Months**

Denominator Exclusion: Updated to specify time frame for each exclusion reason.

Updated Denominator Exclusion Verbiage: - active diagnosis of bipolar disorder, personality disorder (select types; cyclothymic, borderline, histrionic and factitious), schizophrenia, psychotic disorder or pervasive developmental disorder, or personality disorder emotionally labile any time prior to the end of the measure assessment period. Patients who were a permanent nursing home resident any time during the denominator identification period or the measure assessment period.

2023 CMS Web Interface Quality Measures Changes

- **ACO-20 (PREV-5) Breast Cancer Screening**

Updated logic for determining patient's age for denominator inclusion: To assess the age for denominator inclusion, the patient's age on the date of the encounter should be used.

Updated logic for determining patient's age for denominator exclusions (long term care and frailty): To assess the age for exclusions, the patient's age on the date of the encounter should be used.

- **ACO-19 (PREV-6) Colorectal Cancer Screening**

Initial population: Updated to patients 45-75 years for age who had an appropriate screening for colorectal cancer. In previous years, the measure was applicable to patients 50-75 years of age.

Denominator Exclusion: To assess the age for exclusions, the patient's age on the date of the encounter should be used. In previous years, the guidance was - to assess the age for exclusions, the patients' age at the end of the measurement period should be used.

2023 CMS Web Interface Quality Measures Changes

- **ACO-14 (PREV-7) Influenza Immunization**

This measure has been updated to allow reporting receipt of influenza immunization for the two flu seasons (Flu Season 2022-2023 and Flu Season 2023-2024) that fall within the performance reporting period.

For the purposes of the program, in order to submit on the flu season 2022-2023, the patient must have a qualifying encounter between January 1 and March 31, 2023. In order to submit on the flu season 2023-2024, the patient must have a qualifying encounter between October 1 and December 31, 2023.

2023 CMS Web Interface Quality Measures Changes

- **ACO-17 (PREV-10) Tobacco Use: Screening and Cessation Intervention**

Updated measure description: Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within the measurement period AND who received tobacco cessation intervention during the measurement period or in the six months prior to the measurement period if identified as a tobacco user.

Medical Exclusions Removed: Documentation of medical reason(s) for not screening for tobacco use (e.g., limited life expectancy, other medical reason)

2023 CMS Web Interface Quality Measures Changes

- **ACO-18 (PREV-12) Screening for Depression and Follow-up Plan**

Updated measure description: Percentage of patients aged 12 years and older screened for depression on the date of the encounter or up to 14 days prior to the date of the encounter using an age-appropriate standardized depression screening tool AND if positive, a follow-up plan is documented on the date of or up to two days after the date of the qualifying encounter.

2023 CMS Web Interface Quality Measures Changes

- **ACO- 42 (PREV-13) Statin Therapy for the Prevention and Treatment of Cardiovascular Disease.**

Risk Category changes:

Risk Category 1 has been updated to "Patient was previously diagnosed with or currently have ~~an active~~ diagnosis of clinical ASCVD, including an ASCVD procedure, before the end of the measurement period."

Medical Exclusion response has been updated to: "Medical Exclusions: Patients who are breastfeeding or who are diagnosed with rhabdomyolysis." Patients who are pregnant has been removed as an exclusion.

Medical Exceptions has added: "Documentation of a medical reason for not being prescribed statin therapy"

Reminder - Reporting Timeline

Description

Time Period

Patient ranking files to be available for download from CMS Web Interface.

December 21st, 2023

Patient list populated in Health Endeavors CMS WI Random Sample 2023 interface.

48 hours upon receiving the sample.

The CMS Web Interface **opens** for quality reporting (data entry and submission).

January 2rd, 2024

Reminder - Reporting Timeline

Description	Time Period
Health Endeavors uploads data via API to CMS Web Interface on weekday daily basis.	January 9 th , 2024
Health Endeavors to stop taking 2023 EHR Imports (automation and Submit a Request files).	February 19 ^h , 2024
Health Endeavors stop processing CCLFs for patients included in CMS WI Random Sample.	CMS WI Random Sample 2023 patients won't be updated with answers from claims data after the January CCLFs import.
Health Endeavors' Single and Spec File Mass Imports.	Last date to submit is March 24 th , 2024
Health Endeavors Manual Key.	Last date to submit is March 24 th , 2024
The CMS Web Interface <u>closes</u> for 2023 quality reporting (data entry and submission).	March 24 th , 2024

Tips & Pitfalls

Have a Plan of Action for excessive measure Skips; e.g. not able to confirm diabetes.

Do not get stuck on 1 record. In the first 14 days complete as many records as possible.

You can always return to a record.

Do not spend a lot of time on requested dates in the questions if not legible as CMS allows you to default to **December 31, 2023**.

Do not overwrite data unless you are certain of the data is correct and more recent than the data entered.

Be done in 8 weeks (NOT 12 weeks)

Sample Size and Ranks

- Random Sample Rank file announced to be delivered by CMS on December 21st, 2023.
- Patients ranked 1 to 616 in each Module (except for PREV-13, Statin Therapy , that will have a sample of 750 beneficiaries).
 - May have less than 616 if not enough patients to fill the module.
- **ACO required to complete 1 to 248 consecutively.** For each patient that is skipped, the organization must completely report on the next consecutively ranked patient until the target sample of 248 is reached or until the sample has been exhausted.
- 249 to 616 the oversample (Patient or Module Skips).

RED Number = Ranked and Complete module with non-performance answer

GREEN Number = Ranked and Complete module with performance answer

BLUE Number = Ranked and Complete module with denominator exception answer (not scored)

ORANGE Number = Ranked Patient and skipped (e.g. N/A chosen). Only Module is Skipped, not the entire patient.

🚩 = Patient has claims data

WHITE Number = Ranked and Incomplete module

QRDA Category I Files

QRDA is a Clinical Document Architecture (CDA)-based standard for reporting patient quality data for one or more quality measures

- **QRDA Category I (Single Patient Report)**
Individual patient-level report that contains data defined in the measure.
- **QRDA Category III (Calculated Report)**
Aggregate quality report with a result for a given population and period of time.

Health Endeavors only accepts QRDA Category I files.

QRDA is a CDA-based standard designed to have those data elements needed for quality measurement.

Single File Import Tool

- Only positive questionnaire responses can be uploaded with the tool.
- Select the module and related question you would like to complete.
- Upload the properly formatted file that contains the patient MBI or Patient First Name, Last Name and DOB.
- You will be provided a preview of actions to be taken prior to any updates being committed.
- The process is limited to 1000 records per upload.

ACO Security Official CMS WI Random Sample Decisions

ACO administrative user (Security Official) must configure priorities for measure data sources, preferences for CMS WI Random Sample 2023 portal and final quality measures data submission to CMS.

Indicate Data Priority for each Measure	Claims (CCLF) Imports	EHR Data Custom Imports	EHR Data Single/Spec File Imports	Manual Key Data	Carryover Data from Previous Year
ACO 27 - DM with HbA1c > 9 percent (poor control)	Select **	2	3	1	[Not Available]
ACO 28 - Controlling High BP	Select *	2	3	1	[Not Available]
ACO 40 - Depression Remission	Select ***	2	3	1	[Not Available]
ACO 20 - Breast Cancer Screening	Select a l	3	2	1	Select a
ACO 19 - Colorectal Cancer Screening	3	4	2	1	Select a
ACO 14 - Influenza Immunization (Flu Season 2022-2023)	4	3	2	1	[Not Available]
ACO 17 - Tobacco Use: Screening and Cessation Intervention	4	3	2	1	[Not Available]
ACO 18 - Screening for Depression and Follow-up Plan	4	3	2	1	[Not Available]
ACO 42 - Statin Therapy	4	3	2	1	[Not Available]
ACO 13 - Falls: Screening for Future Fall Risk	4	3	2	1	[Not Available]
Default No Diagnosis? (Lowest Priority) Set answer to N/A if the patient has Monthly CCLF Claims Data with no indication of the diagnosis included in the measure. Applies only to at-risk population measures			Yes

CMS WI Random Sample 2023 Decisions

CMS WI Random Sample Decisions

Options	Response
<p>Launch CMS Web Interface 2023 The first available date is January 15, 2023. CMS Web Interface 2023 is locked to your 2023 HALR file and cannot be changed until the Q1 2023 QALR file is received.</p>	03/27/2023 
<p>Date to enable CMS WI Random Sample 2023 saving This will enable saving in CMS WI Random Sample 2023 and simultaneously disable CMS Web Interface 2023 portal. December 23, 2023 is the first available date, however this date is subject to change depending on the release of CMS WI Random Sample.</p>	12/23/2023 
<p>Do you want to unlock TIN / NPI assignment for CMS WI Random Sample 2023? Please be careful changing this selection - it will allow you to make changes to the TIN/NPI Assignment for patients included in your CMS WI Random Sample for 2023. Your initial selection will take effect on the date to enable CMS WI Random Sample 2023 saving above. It is defaulted to No, which means we will NOT unlock your TIN/NPI assignment and apply updates that you have made. The initial assignment is as of the date the random sample was populated. If you decide to change to Yes, this means you WILL unlock your TIN/NPI assignment and apply updates that you have made if you change to Yes and then No, you will move forward with the assignment at the time you made the change.</p>	Yes 
<p>Date to finalize CMS WI Random Sample 2023 submission This will disable saving in CMS WI Random Sample 2023 portal. The last available date is March 24, 2024.</p>	03/24/2024 

What is my practice or NPI quality score?

Quality Measures Scoring Tool calculates scores at the practice/provider level.
